Subject: Basin Plan Amendment

Hello. I join many others in asking that you withhold voting on the Basin Plan Amendment concerning Santa Rosa's wastewater discharge until a number of issues have been addressed and resolved, including:

- . Monitoring wastewater quality
- . Defining incidental runoff limits
- . Setback requirements from any streams and streambeds
- . Excluding lawns treated with pesticides, fertilizers, herbicides, and the like from irrigation with treated water
- . Withholding wastewater irrigation from violators of irrigation rules
- . A sunset or re-opener clause to allow for future information concerning contaminants

Thank you.
